# Unleash the POWER

## of Your Kitchen & Bakery Team

## Expert training in the palm of your hand.

The Ignitor Labs Solution delivers manufacturer-approved, easy-to-use, interactive reference and training tools for front-line staff to operate and maintain mission-critical equipment. Nothing comes closer to face-to-face training. Our secure, cloud-based mobile technology reduces equipment operating costs through proper maintenance, helps ensure food quality, improves safety practices and maximizes equipment uptime by avoiding unnecessary service calls.

Our solution includes a customizable Learning Management System which managers can use to distribute content, control access, monitor activity, track compliance and manage certification for your entire team. Now you can afford to train your front-line staff from their first day on the job.
